

MAINTENANCE

The City of Memphis requires that construction contractors implement Best Management Practices on sites to prevent polluted runoff and eroded soil from entering storm drains. Debris and chemicals can flow into local waterways through the storm drain system. This type of pollution is harmful to both humans and natural ecosystems.

See reverse for a quick-reference guide to the maintenance requirements related to pollution prevention planning.

MAINTENANCE

Name of the person responsible for erosion control checks:

-
- ✓ All erosion control and sediment removal structures must be in place and operational by the end of each work day.
 - ✓ All sites in the City of Memphis require documented weekly inspections per TDEC construction permit requirements.
 - ✓ Keep mud out of roads. Most construction site complaints are caused by dirt in the road!
 - ✓ All deposited soil must be removed and returned to the site to restore the sediment removal capacity.
